970. FEMA Independant Study Courses.

Yahoo group: huroncountyamateurs
Date: 2013-01-06 21:53:10 UTC
From: kb8dna
Topic: 970 Message: 970

As of Jan. 2013 ALL ARES Members are requested to take the following FEMA Courses. IS100, IS200, IS 700, IS800. These can be found at:

http://training.fema.gov/IS/crslist.asp?page=2

At this time these courses are NOT mandatory but completion is suggested. These are not really difficult classes and will take an hour or 2 each to complete. Per the attached memo from Matt (State EC) send your completed certificates to Scott N8SX@... and a copy to me. If you have already taken some of these you will still need to send in your certificates to Scott. Please contact me if you have questions or need assistance.

"Attention all Ohio ARES volunteers,

Starting January 1st, 2013, Assistant SEC Scott N8SX will begin collecting FEMA Independent Study course completion certificates or transcripts from all ARES volunteers in Ohio. We are interested in collecting any and all of your FEMA training certificates or transcript regardless if you completed one course or 120 courses.

If you do not have some, any, or all of your FEMA training certificates, you can request a free transcript from FEMA. Go to the Training page on the Ohio Section website to learn how. http://www.arrl-ohio.org/SEC/training.html. This does not include IS-300 or IS-400. Those will have to be obtained from your instructor.

So here's the scoop...

1.If not done so already, begin looking for all your FEMA training completion certificates or transcript. Again, we're interested in any or all of your FEMA training.

2.Please do not submit your certificates until January 1st. We are still in the midst of collecting FEMA training certificates from the ARES leaders at this time so please wait until January 1st.
3.FEMA training certificates or transcript should only be submitted in electronic format. PDF documents are preferred but any electronic format is acceptable. If you only have hard copies, please scan them into PDF and email them. This can be accomplished at little cost at Staples, OfficeMax, or similar.

4.Please do not send or have to be sent hard copies. They will be destroyed upon receipt. For one, there is nowhere to store the hard copies and two they contain social security numbers. Your security is very important to us so we ensure your social security number is blacked out on the electronic copy of your documents. So no hard copies please. Electronic format only.
5.On or after January 1st, 2013, please submit your FEMA Training certificates or transcript to ASEC Scott N8SX at n8sx@.... Please be sure to include in the email, your name, callsign, and what county you are are from.
Why are we doing this? Of the 2000 ARES volunteers being reported each month, it has never been determined as to how many of them have completed FEMA training. I believe we're going to find that more hams in Ohio have completed the training than we realize. I think this

will be an "eye opening" experience not only for us at the Section level but also those at the District and County level. I, for one, am looking forward to seeing the results of the hard work done by the volunteers in Ohio. I thank you very much for your support in this mission.
Feel free to contact me should you have any questions. Should you have any comments, be sure to post them on the ARES Blog. http://www.arrl-ohio.org/SEC/blog/index.php.

From: <claybenner@...>
Topic: 1193 Message: 1193

Congratulations to Seth (KD8RBP). Seth has accepted an appointment as a Huron Co. ARES Assistant Emergency Coordinator. In this capacity he will continue to work with the Digital Nets and will be the Huron Co. representative on OSSBN and other traffic nets. He will also take the lead on other future projects. I want to Thank Seth for all his past assistance and look forward to working with him.

1285. "No-Nonsense" HAM study guides available in the files section.

Yahoo group: huroncountyamateurs
Date: 2014-03-21 02:17:26 UTC
From: <luckyx2go@...>
Topic: 1285 Message: 1285

I have uploaded the "No-Nonsense" study guides for the Technician Class and General Class exams to the files section. These guides were created by Dan [KB6NU] and all credit goes to him. I am simply making these available so that others may use them to study for the exams.

These are also available on his website at http://www.kb6nu.com http://www.kb6nu.com and are available free. The site also includes other formats for these guides which are compatible with certain tablets and other devices. There is an Extra Class study guide listed on his site, but there is a cost for that guide so I will not be including it here.

Hope these help, and good luck to anyone working on obtaining/upgrading their license.

"Lucky"

1631. Main Repeater

Yahoo group: huroncountyamateurs
Date: 2015-10-13 17:23:19 UTC
From: claybenner@...
Topic: 1631 Message: 1631

As of about 11am this morning the 'back-up' repeater is turned off and the 'main' repeater is back on the air. Everything appears to be operating fine. The coverage of the repeater appears to have increased considerably, with the height change to about 270'. Please check the signal at your location and let me know how it has changed on both receive and transmit,
Thanks
Clay

1665. Antennae

Yahoo group: huroncountyamateurs

From: ww8swt@...
Topic: 1665 Message: 1665

Yep, that is more than one. There are three HF antennas I need to dispose of.
1. KJ7U Screwdriver with top rod and wiring harness $200.00
2. Ameritron SDA 100 with DX engineering Capacity Hat "Hot Rod", wiring harness and weldable mount $200.00
3. MFJ Rotatable Dipole #1775 6 Band. Used in Florida to talk back to Ohio. Works great. I made a modification to make it truly transportable. $100.00

Check them out on line and you will see what a savings you can have.

1675. ARES Training

Yahoo group: huroncountyamateurs
Date: 2016-02-17 19:36:27 UTC
From: claybenner@...
Topic: 1675 Message: 1675

As you are all aware, ARES on the State and national level is slowly changing. We are being ask to take more responsibility and be better trained and have certifications. We are ALL being required to complete at least 4 FEMA courses on "Incident Command System". These courses at are 1 hour in length and are "web" based. The web site is Emergency Management Institute - Independent Study (IS) | Course List
http://www.training.fema.gov/is/crslist.aspx?page=3

http://www.training.fema.gov/is/crslist.aspx?page=3

Emergency Management Institute - Independent Study...

View on www.training.fema.gov http://www.training.fema.gov/is/crslist.aspx?page=3
Preview by Yahoo

And the classes required are IS-100.b; IS-200.b; IS-700.a; and IS-800.b. You will get a certificate for each course (when completed) and you MUST send me a copy of your certificates so I can forward them to the State and keep a copy on file. I have certificates from AC8AP, KB8DNA, K8QB, KD8KWV. I have 2 from KD8RBP and 1 from KD8ZQK. EVERYONE else needs to complete these courses and send me certificates.
If you have questions or need help "just ask" .....
THANKS

1712. New Icom 5100 for sale

Yahoo group: huroncountyamateurs
Date: 2016-06-02 20:12:56 UTC
From: k8arl@...
Topic: 1712 Message: 1712

I have a new Icom 5100 for sale - DSTAR/analog, dual band, VHF/UHF, touchscreen. Never used. Purchased last year at Dayton Hamvention.

I will sell the radio, programming software and cable for $500 firm cash/PayPal plus shipping, or you can pick it up.

Lowest price for radio alone has been $500 special at Hamvention this year. Radio regularly sells in the $600+ range.

Can't negotiate price unless you want to offer me MORE money! Chuckle

Send me email, private message on this group. K8ARL at K8ARL COM

73,
Karl Erbland K8ARL

I may be at Norwalk on June 7 for Skywarn meeting if that helps.

1732. Happenings this week in Ohio.

Yahoo group: huroncountyamateurs
Date: 2016-07-22 13:59:55 UTC
From: claybenner@...
Topic: 1732 Message: 1732

Just to let you know some of the things that have been happening this week in OHIO.
Clay

"Ohio has started an intense week. With the NAACP convention in Cincinnati and the Republican National Convention in Cleveland, many thousands from all over the nation will be in our state. Most, if not all, will never know that amateur radio operators were among the thousands who either as professionals or volunteers gave of their time and energy to make sure their visit was safe and productive.

And why are we even involved? Number one- to serve our communities, and our various agencies who rely on us to be there. Number two- to function as a backup communications path in case any of the normal modes fails. Number three- to keep amateur radio involved (in this case, at the highest levels) so we can be seen as an active partner, trained and qualified to assist in times of emergency. I consider our involvement a “Big Deal!”

Internally, we are probably all “spun up” for what will be perhaps the most boring assignments we may have in terms of messages and radio traffic. If their stuff all works the way it should, we shouldn’t be in the limelight. But authorities aren’t playing this game halfway…readiness for ~any~ situation is their plan and that’s as it should be. If we come away from this with radio logs containing nothing but hourly checkins, it will be a success on our part! I am praying for no violence and that people just behave as adults.

Given that we are “only” a backup, what do we learn? For those directly involved, just the preparation has put us through the ringer. In Cleveland, a year’s worth of meetings has led to a much greater understanding of how not only the locals but the national safety agencies think and operate. Add in Cincinnati and Akron, and we were able to have a front-row seat to see how our agencies plan and execute for “a big one.”

We’ve learned that no matter how big the agency, there are shifts, decisions countering earlier decisions, and changing plans right up to the last minute. Honestly, some of that reminds us that we’re all human, and sometimes it might not roll as we’d expect. But, that’s not on us! Remember ~they~ don’t deal with this stuff every day, either. “Adapt and overcome” along with the serenity prayer are two of our biggest tools when dealing with setup and execution!

We’ve learned that we can’t just “wing it” when it comes to our internal planning: personnel, radio facilities, frequencies, modes, and scheduling are all major considerations that EVERY EC needs to practice! The “new truth” in amateur radio and ARES is that we probably won’t be able to count on a large number of volunteers to step forward! For whatever reason (work, health, other valid commitments) we must rely on surrounding counties and even those further away for manpower to fill our schedules. For perspective, ~so did the cops~! They were pulling safety officers from across the state.

We learned that with the development of a variety of digital modes and the Internet apps comes a time to make a choice of which modes we use. You all know that our OSERP is at the basic level- we cannot assume repeaters, internet, or any dependence on any other form other than RF. But this isn’t a communications emergency…there is no deficit (well, except

for cell service in downtown Cleveland). So why not apply things like Echolink, DMR talk groups, and RF linking? We are able to assembly a broad ranging package of communication that functions as a great test for the future!

This event is giving us (and the State) a chance to test the CIMS credentialing system, for identification to be used with the Red Cross in Akron. It's been a separate challenge, as it's the first time the system has actually been put to real use. SM Scott Yonally, N8SY, has been working with them since this was introduced- and he worked nearly an entire day to get through some last minute hurdles with the State. He'll have several meetings in the aftermath to help reconcile the system to 'real life' incidents.

We've learned that those FEMA certificates make or break our ability to be on the "inside" of these operations. Kudo's to those of you who've stepped up!

We have learned anew what many in all levels of this 'emergency' business will tell- it's more about the "Who" than the "what"… it's about relationships. (Where have I heard that before??) It all works best when we all work together…and part of that is we remember our "place" in the pecking order.

So if it all were to stop right now, as the events are just getting started, I will regard this as a great success for ARES in Ohio, and for amateur radio!

The most important thing I can say is, "Thank you!" to all who are going to be involved. And I want to point out some "Superheroes" among us: Cuyahoga County EC Matt Nickoson, KC8NZJ, Summit County EC Ken Dorsey, KA8OAD, and Hamilton County EC Bryan Hoffman, KC8EGV. Along with District EC's Eric Jessen, N8AUC, Dennis Conklin, AI8P, and Steve Lewis, N8TFD these guys have been absolutely exemplary in organizing their communications, their people, scheduling and most of all interacting with their agencies. Here is an example of that- from Jim Sage of the Red Cross. Bear in mind this guy had logistics over five states in the wake of Hurricane Sandy, and he's been all over the world with disaster relief.

"I am impressed and excited to work with Matt and Ken. They have, so far, demonstrated the best organization and willingness to work with Red Cross that I have seen in the past 20 years of disaster work. Looking forward to an exciting venture.
Jim"

And that, my friends is what it's all about!! I'll be in my "Canned Ham" communications trailer at the Ohio EOC (The Sarge is not quite into our new station right in the EOC). Talk about adapt and overcome…

Again, thank you so much for all your time. We'll try to keep you updated as things go- but remember in these circumstances, "A quiet net is a GOOD net!"

Stan Broadway, N8BHL
Section Emergency Coordinator – Ohio
ARRL - The National Association For Amateur Radio™

Here is the latest update from our Ohio Section Manager. Clay

"Hi Gang,

WOW.. What more could anyone say about this past week! I want to personally thank all of our great Ohio Section ARES volunteers that gave of themselves completely, got all the required ICS training in, and met all the goals. It will go down in the history books for sure.

Yes, we did it!! We successfully trained, equipped and staffed numerous locations for the NRC and NAACP conventions simultaneously. How much more could anyone ask for.

Yes, we did use the brand new Ohio Department of Homeland Security Credentialing System (CIMS) too. It worked! We were able to get State of Ohio credentials into the hands of our volunteers when and where needed. Just as it was advertised!

I can’t express my happiness more in Ohio’s ARES program. I heard nothing but praise from government leaders, Red Cross and EMA Directors all over the state as I visited with them about the willingness and professionalism of the Ohio ARES Corps.

Stan, N8BHL, my hat is off to you sir, and all of your fantastic Ohio Section ARES staff!

I have a number of pictures posted of the different locations, but can use more if you have them. Go to:
http://arrl-ohio.org/rnc/index.php http://arrl-ohio.org/rnc/index.php to see some of the action as it
was happening.

Again, thanks go out to all of our great Ohio Section ARES volunteers for a job “Well Done!!”

1756. Huron County Digital Net - Monday, Nov. 28th, 8:00 pm

From: k8smh@...
Topic: 1756 Message: 1756

We will be holding a Huron County Digital Net next Monday, November 28th at 8:00pm. We meet on 147.480 simplex and use the Fldigi and Flmsg programs for digital. We will be monitoring the 146.865 repeater for voice and assistance. We begin the net in the Olivia 8/500 mode centered at 1500Hz on the waterfall and regularly use the MT-63 2000L mode for sending test messages and traffic. You can download the latest versions of the programs at https://sourceforge.net/projects/fldigi/files/ https://sourceforge.net/projects/fldigi/files/ If anyone has any questions on digital setup or the net you can e-mail me at k8smh@arrl.net (K8SMH at ARRL.net).

Note: if installing the latest version of Flmsg 4.0 that has just been released, be sure to choose the prompt that says "Communicator / Expert" mode from the options that come up after running the program for the first time instead of the simplified "Service Agency" mode to see the familiar user interface you are used to using.

Seth, K8SMH
North Fairfield

1764. Repeater "sick"

Yahoo group: huroncountyamateurs
Date: 2016-12-05 20:18:29 UTC
From: claybenner@...
Topic: 1764 Message: 1764

As of 2:30pm the .865 repeater is now operating without a preamp so it will NOT "hear" as well as normal. I will attempt to get a new preamp on tomorrow and see if that fixes the 'desense' issue we were having today.

Used and recently checked for operability, Alinco DX70TH (HF = 6M) and Tuner for $375.00.
I will even throw in some long wire.
